IMPROVING AWARENESS OF AT TOOLS FOR **INCLUSIVE** LEARNING **ENVIRONMENT** AT UAL

Assistive Technology Software and Tools

Syahrizal Shafie

P

Research Question

How can awareness and utilisation of Assistive Technology tools at UAL be improved to create a more inclusive learning environment for students with disabilities?

Background

• I work at the Learning Technology (LT) Department at LCF.

The States of States

- Consistent inquiries reveal a lack of understanding about the range of Assistive Technology (AT) tools available at UAL.
- No clear ownership or communication pathway regarding the deployment, support, and management of AT software.

 AT-related information on the UAL website and Canvas platform is scattered and difficult to navigate, creating accessibility challenges.

 UAL provides a great selection of AT tools that can support diverse learning needs effectively—if utilised and communicated properly

Rationale

- It is becoming quite challenging and overwhelming for students and staff to locate all the information about AT at UAL.
- A lot students are unaware about the existing of this software
- Gold standard, premium, full license are expensive

Assistive Technology

Assistive Technology (AT) refers to any device, software, or system that helps individuals with or without disabilities or learning difficulties perform tasks that might otherwise be challenging or impossible.

Land Hilling (Spinsor 2)

In an academic setting, assistive technology (AT) refers to a range of tools, software, and devices designed to support students in accessing educational materials and participating fully in their studies. The goal is to reduce barriers to learning, accommodate diverse needs, and provide an inclusive learning environment that enables all students to succeed. Assistive Technology Software

Note Taking – ClaroCapture, OneNote Reading and Writing – Read&Write, ClaroRead **Proof Reading** – Immersive Reader, ReadU&Write **Dictation** – Dragon, Office365 **Referencing** – Zotero, RefWorks Screen Reader – NVDA, Narrator **Planning** – MindView, Inspiration, Xmind **Organising Tools** – Trello, OneNote **Converting Documents** – SensusAccess, Adobe Acrobat Pro

A DE LA CARA

Method of Data Collection

- Online Survey Students and Staff at UAL
- Key Objective:
- **1. Assess students' awareness** of the digital accessibility tools and software available at UAL.
- 2. Understand how students learn about these tools and the effectiveness of the communication and information provided by the university.
- **3. Evaluate the perceived effectiveness** of the accessibility tools they have used.
- **4. Identify challenges** students face when trying to find or access information about these tools.
- **5. Gather suggestions** on how to improve awareness and accessibility of the tools.

Level of Awareness

	Q4			
	Frequency	Percent	Valid Percent	Cumulative Percent

AT Learning Hub

- Combines all AT information across various UAL platform such as UAL website, canvas, library and IT Services
- Using Technical Resources SharePoint compatible with our current Microsoft365
- The page will make it easy to find available software and locate the machines where it is installed, allowing students to access and use it while in UAL buildings
- AT Learning Hub

Software Availability

Here, you can guickly and easily search for the availability for the software you need for your projects. Whether you're looking for Adobe Cre Cloud, Claro, or any other accessibility tool, simply enter the name of the software, and we'll show you the description and availability (free, r purchase or university purchased)

Limitation & Future Research

• Limited Sample Size – May not reached all relevant stakeholders, broad representative students, staff and departments

LEP DUNAN /

- Scope of Feedback Focus heavily on awareness and training but lack of challenges with software compatibility, licensing issue and infrastructure
- Limited Exploration of Training Implementation While training and inductions were identified as important, the survey may not delve deeply into how such programs could be effectively designed, delivered, and evaluated for maximum impact
- Investigate how AT tools and software can be more effectively integrated into teaching and learning practices.
- Providing information about designated rooms, spaces, and desktops equipped with AT software across UAL campuses.
- A system where students can easily book training sessions or one-toone tutorials on using AT tools directly through hub.

Thank you
